How was your enjoyment/attitude towards school, compared to past years?

24 responses

Please explain.

23 responses

I used to not like this school because last year i thought there was not enough activity. At my old school we went to PE everyday because it was a class! there is lots of activity and movement in this class.

Because i new i was going to have fun all day.

This year was way better because I grew with reading and math.

In all my other classes i was stuck behind my desk for hours but this class changed that all and i love being outside.

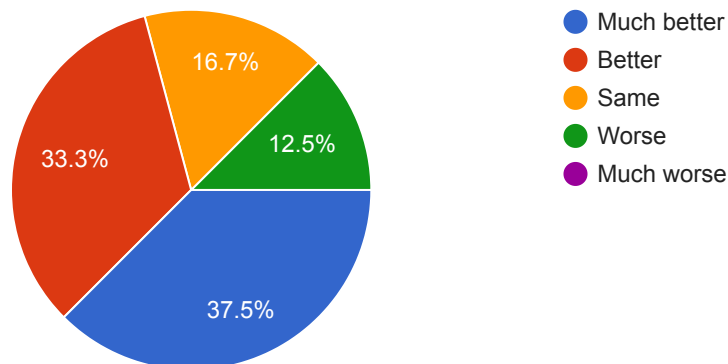

I liked it as much, simple

we got to do learn about the middle ages and the renaissance and we got to do games with what we learn and we get were we want to sit we get meditation, and all the stuff we do it helps me

My past years in school i only went outside out side,but only for recess.

How was your internal motivation towards school, compared to past years?

24 responses

Please explain

24 responses

I stil think the school is ok and i dont think this class really made me think worse or better of the school

Well before i come to and sit in a chair doing work all day but now i go out side and have fun.

In Movement Method's we did fun games, so then we did not get bored.

I was more focused so we can play and have fun more.

More fun activities

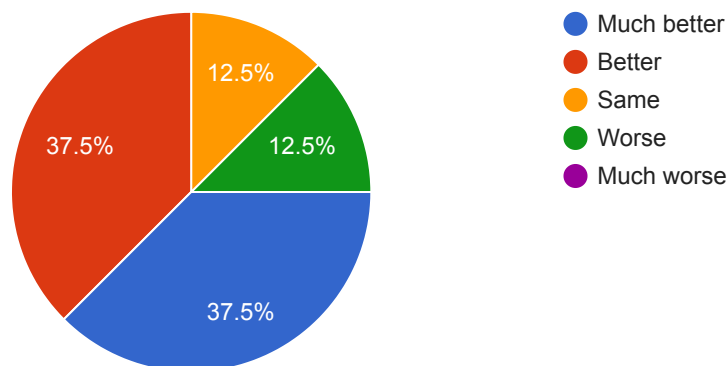

its nice playing games just maybe some more coding some more games with one person and some more tag game just like 1 or 2 more.

This year was way better than other years because i grew in math,reading.

Its homework we all feel the same about it.

How does Movement Method's academic rigor (difficulty) compare to past years?

24 responses

Please explain.

23 responses

i like the level of hardness and funness in the games its a very fair balance.

Because we still do work like the previous years.

It was better because I didn't get that upset when I didn't pass things and I worked even hard at them.

It was easier because i could remember and learn better by being physical.

Higher difficulty, i like it!

because there is covid and we did not to get alot but last year we did

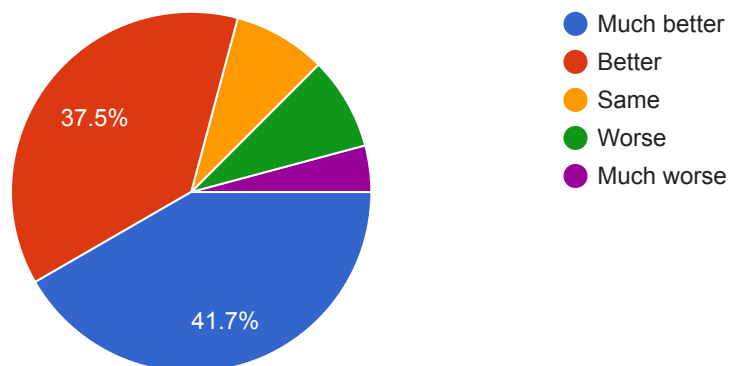

Movement methods was difficult,but it helped me grew as a math person.

We play games relices strece.

I always have energv so in the past beind in school told to sit and be quiet was hard for

Did Movement Method help with any emotional need you had compared to past years?

24 responses

Please explain.

20 responses

i feel as if mr.lang did not understand my feelings as much as my past teachers

Because i would be free more then the previous years.

I use to get upset when I got a bad grade but know I work even harder then before.

Its was better because i could get my mind off the hard things.

well, same.

when i'm all ways down the class helps me and i fell better.

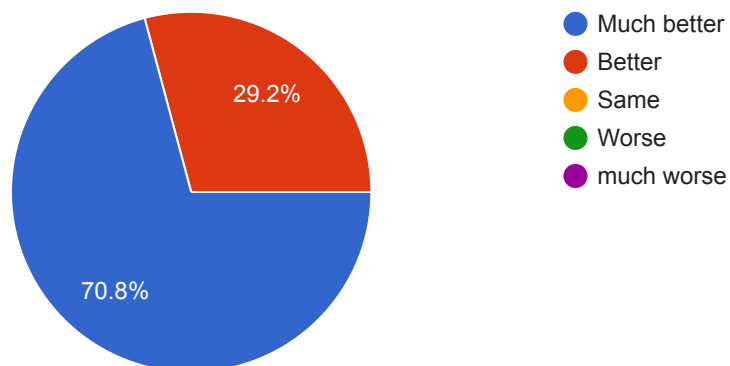

It was better because i didn't get frustrated that much when my scores went down,so it taught me not to always be grumpy or mad.

It relicees stress.

I always was bored in school in the past and when i got to plav math and reading games

How does Movement Method's project based learning compare to past years?

24 responses

Please explain.

21 responses

i love all the activities and i remember mostly everything and i usually dont remember much

Like when he made us do the play it rely made under stand the charterers.

In my past years we had to sit at a desk all day but now I get to move around.

Most of the stuff we learned i kept remembering by being physical.

Best of the school so much fun, like molding salt dough

the projects we do helped me learn like the crystal and the plants and the tag games

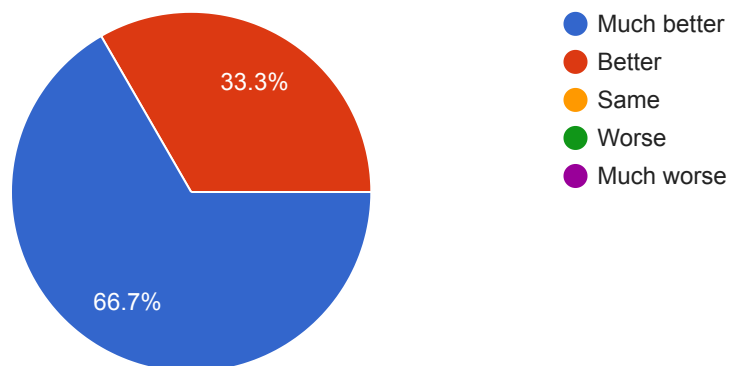

We did more activity to help me learn more quicker.

Its fun and so we remember and you are so sweet.

The proiects were fun cause they were math or reading and reading but in an activitv like

How does Movement Method's outdoor learning environment compare to past years?

24 responses

Please explain.

22 responses

none of my other classes have had outdoor activities

Because when he teaches us he dose a outdoor activate.

Movement Method's outdoor learning environment let me get more time with the nature and let me learn more about it.

In the past years we could do barely do any of the things we did this year and being outside was just refreshing.

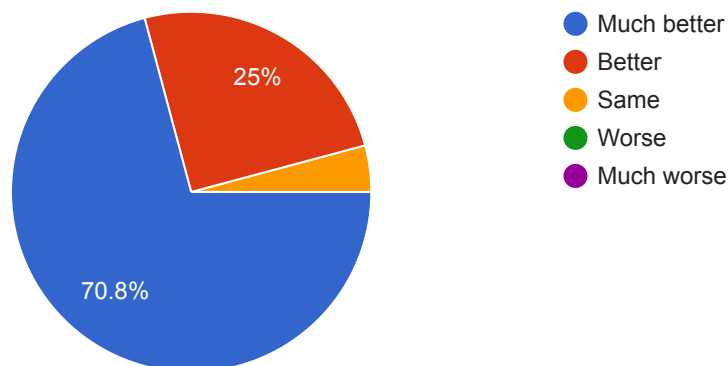

LOTS more fresh air, makes a better learning area (unless it snows, i don't wanna sit down in SNOW)

in 4th grade we went out one time and in this class we got to go out side and get fresh air and we get to do some work out there we play games and water plants.

Better because it taught me the proper life cycle

How does Movement Method overall compare to past years?

Is there any other feedback you wish to give?

22 responses

that i think you should keep movement methods alive for the best year before middle school!

It was rely fun

There is no other feedback I wish to give, except sometimes I wished we worked outside more.

It was better than all the past years because most of the things i wanted to do i did in this class.

not. at. all. :) happy!

we get to do more stuff

I would say to have more running games because some kids get more energy more faster than others
